## CHIEF'S REPORT

JULY, 2019

### Operations and Activities

During the month of July, 2019, Victor Fire Department responded to 44 calls, including:

- 0 fires
- 1 overpressurization/ explosion
- 2 motor vehicle collisions/ rescue
- 4 EMS calls
- 4 hazardous conditions
- 8 good intent/ service calls
- 11 false alarms
- 14 mutual aid: 2 to Farmington, 12 to Fishers.  
We received mutual aid on 6 calls (6 Fishers).

The average attendance per call was 7.6 firefighters (4.2 average on scene), providing a total of **172** hours of service. We had a Victor Fire unit on scene within 5 minutes at 53% of the calls and within 9 minutes at 86%.

There were 7 training events totaling **153** hours of service; 4 were department wide, averaging 15.5 firefighters.

In addition, there were 12 other events (meetings, parades, work details, etc.), where our members provided an additional **66** hours of service. All told, our members have provided **391 hours of service** this past month.

The Chief's Office, in addition to routine business, participated in the following (these are not captured in the hourly reports):

- 5 Fire Service Coordinated Plan Reviews (Town) plus 1 review for a Village Planning Application
- District staff meeting
- Line Officer Budget planning meeting
- Review of insurance binder with Commissioner Turner and Rob Anderson
- Workshop on "NavigatePrepared", the school emergency reporting system
- Meeting with Ontario County Civil Service with Commissioner McConnell and Lisa Hauf
- Coordinated meeting between HVAC and alarm vendors.
- Meeting with Greenlight networks

On July 6, 2019, we responded to 7 storm related calls, most of which were in Fishers district, including one where we helped to relieve a overwhelmed cross-over pipe on Gillis Rd by pumping over the road. Throughout the month, our members also participated in several area carnival parades and 2781 attending a funeral for a retired paid firefighter being interred in St. Patrick's Cemetery.

### Apparatus Issues

# Victor Fire Department

Pump testing and main line apparatus chassis service has been completed; our service vendor found a list of items to be addressed. The list is under review. We have noticed the mechanical step on 2771 is not extending fully and the Federal Q siren ground wire on 2712 is falling off. Ass't Chief Lockwood will address these concerns personally.

The annual Hurst testing has been completed.

The rear brakes on 2771 are locking up again; after the vehicle sits for a period of time, the operator has to put the vehicle in reverse for a foot or two to release the brakes. At one of the drills, the brakes locked up again, leaving a significant drag mark out the bays and down Adams St. The vehicle is scheduled for work the week of August 5.

## **Building & Equipment Issues**

On July 30, the SCBA fill station compressor motor overheated, resulting in a heat detector activation. Our crews responded, shut off the power to the unit, and ventilated the system. We attempted to call our normal vendor to inspect the unit, but after three days of no response, chose Jerome Fire Equipment to complete the work. The unit is working again.

The HVAC system has been repaired, and all four RTUs appear to be running well. The overhead door PM has been completed, and we are scheduling the appliance PM for August.

The base station screens for the MDT and lamResponding displays are installed. We are waiting on some vendor assistance to have them up and running.

## **Personnel & Training**

Staffing levels (53 members, excluding Life/Inactive):

22 Interior	5 Probationary
15 Exterior	11 Service/Administrative

Two probationary firefighters – Stephen Decker and April Rider – have resigned due to scheduling. They were recently hired by Ontario County Sheriff's Department as road patrol deputies, and their workload hinders their ability to spend the time volunteering. Although we have not received it yet, we anticipate Firefighter Tiffani Johnson to be submitting a resignation as well, due to her work schedule.

Firefighter Linda Tice has transferred from Interior to Exterior status at her request.

Firefighters Roman Czornobil and Alex Czornobil have completed the Basic Exterior Firefighting Operations course (BEFO), which is the first half of the Firefighter I curriculum. Lieutenant Kevin MacDonald has completed the 5<sup>th</sup> and final module installment for Fire Officer I.

Respectfully submitted,

Sean McAdoo, Chief.
